ALGA CARTA

Alga Carta is the paper created from algae that, by its abnormal proliferation, was damaging the fragile ecosystem of the Venice Lagoon.

The seaweed particles are visible on the surface to give a unique natural look.

Alga Carta is produced with energy from renewable sources and offset unavoidable emissions. Alga Carta is FSC™ certified, recyclable and biodegradable!

TREE FREE BAMBOO

Tree Free is made solely with annual plants to reduce pressure on forests. Its recipe is 75% bamboo and 25% cotton linters. These high quality fibres give a smooth and natural look as well as a soft touch finish.

Tree Free is produced with renewable energy and offset unavoidable emissions. Tree Free is FSC™ certified, recyclable and biodegradable!

SHIRO ECO

Shiro Echo resets perceptions of 100% recycled paper making it the desirable high quality first choice for businesses with a strong corporate environmental policy.

It is the paper with 100% recycled fibres and superior technical performance. The classic white shades are joined by the Raw collection with their natural rough finish and colours that convey the recycled heritage.

Shiro Echo is produced with energy from renewable sources and offset unavoidable emissions. Shiro Echo is FSC™ certified, recyclable and biodegradable!
